■ HALCYON PORTAL

New Zealand's Leading Claims Management
and Workflow Platform

KARO DATA MANAGEMENT

more efficient - less practice admin - fully integrated

www.karo.co.nz

HALCYON PORTAL

The Halcyon Portal is the flagship service for delivering seamless claiming capabilities to general practice and allied health providers. Halcyon Portal is easy to deploy, update and manage, to ensure clinical staff can focus on delivering high quality primary care.

We believe the Halcyon Portal will deliver the following outcomes for your organisation:

- Reduced time in administrative claiming activities
- Smooth clinical workflow through web-based integration
- Real-time claiming to reduce administrative duties in general practice

Our baseline services include:

- Development and maintenance of a practice Web Portal that integrates into the PMS
- Development and maintenance of a PHO claims management system for managing all aspects of clinical programmes
- workflow management
- Reporting and Analytics
- Business hours Support

Karo can build and configure workflow specific to your PHO.

Example Workflow

- Care Plus
- CVD Risk Assessment
- Diabetes Annual Reviews
- Emergency Contraceptive Pill
- Options for Care – Skin Lesion
- Palliative Care
- Primary Mental Health Intervention
- Smoking Cessation
- Podiatry Form

HALCYON PRICING

all pricing excludes GST

Halcyon provides PHO's a turn-key solution with a proven track record in provider and PHO efficiencies. Halcyon is cost effective and enables practices and PHO's to focus on their core business.

Karo's baseline pricing model provides a PHO with a consistent software as a service cost model to scale up and down according to your population:

Our workflow platform is customisable and one of our staff can take you through the pricing process.

Additional work outside the scope of the initial deployment and scope = \$150.00 per hour

HALCYON PROVIDER PORTAL

Karo provide a secure web application for providers to submit claims to their PHO which is known as the "Halcyon Provider

It integrates 100% into MedTech-32, MedTech Evolution, My Practice, Profile for Mac and Profile for Windows, and can also be used as a stand-alone product in a web-browser outside of a PMS. The Provider Portal contains business logic to determine a patient's potential eligibility for PHO clinical programmes and presents the clinician with a tailored menu on this basis, allowing clinicians to easily assess a patient's eligibility for a given programme.

HALCYON PHO PORTAL

Karo provide a secure web application for PHOs to manage incoming claims, which is known as the Halcyon PHO Portal.

This allows a PHO to track and view the status of any given claim. They have full access to search, view, edit or delete any claim, and can approve claims rejected by the business rules.

Where appropriate, claims that have already been paid can be reversed or adjusted, meaning a credit or debit can be loaded against the claim in the PHO's next claims payment cycle.

POWER BI INTEGRATION

Karo partners with one of New Zealand leading data analytics companies.

Karo has integrated Power BI Analytics into the Halcyon Provider and PHO portals to offer users a seamless integrated solution.

The solution is single -sign-on configurable for practices so all they have to do is login to their PMS and the Halcyon Portal will log the user into the claims and analytics portals seamlessly
